Conclusion:

The study of geography will become meaningful when it is done through field observations and proper records. The main object of organization of study tour has succeeded because students went in the field and they have studied geographical events and factors in reality. Students have seen sea coast and sea waves as an agent of erosion. They have studied coastal and alluvial landforms in details. Students have prepared a study tour report for the submission at the time of annual examination 2021-22 of Practical Paper-II, which is a compulsory part of examination.

It is important to note here that there was no problem at all during a study tour. There are very good facilities available for the students on tour at Pawas, Dist. Ratnagiri.
