**Report on
"Cloud Computing & Artificial Intelligence"**

Date: 10th February, 2024

The Guest lecture on Cloud Computing & Artificial Intelligence was organized by Department of Computer Science, Rajarshi Chhatrapati Shahu College Kolhapur, on 10th February 2024 in Computer Science Lab. Miss. Killedar. M.R. gave introduction of Miss. Archana Nigade (Bits Techno) and felicitated them.

Miss. Sneha ma'am gives introduction to Artificial Intelligence. Also ma'am told benefits of AI like educational platforms can create a personalized learning experience for every student. Furthermore, incorporating technologies like machine learning allows the system to adapt to the unique ways each student grasps concepts.

Mr. Ranjit Vandakar gives detailed information about Cloud Computing. And also added that the cloud delivers more flexibility and reliability, increased performance and efficiency, and helps to lower IT costs.

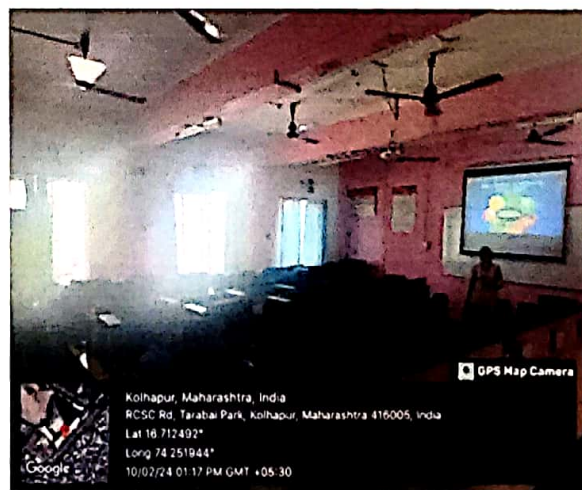

After the lecture question – answers session was started and then end of that session Miss. Salokhe P. P. ma'am gave vote of thanks.

Outcomes

Artificial Intelligence allows students to develop the AI skills that employers are seeking, in machine learning, robotic process automation.

Cloud Computing can help to boost productivity, support remote workforces, and improve operational efficiency.

Beneficiaries: 36 Students
