Report on,
"Preparation of Household Chemicals 2020-2021"

The Skill Based Course was run on a short term basis for the students in the college in the academic year 2020-2021. After appealing to the students for this course, the students expressed their desire for admission in this course. In this connection, the names of 36 students became available for admission in this course. The fee for this course was Rs-300, but all the students did not pay the fees. Many students showed inability to pay the fees due to Corona crisis, so no student fees were collected.

Since the Preparation of Household Chemicals course is hands-on training and demonstration, the students had to take a demonstration in it, but the closure of all the laboratories due to corona, these students could not do the practicals. Those students could not be given hands-on training. As a result, students were given only a few online lectures and shared some online videos and study material for the course.
